Top looks good. Black area where the barrel enters the turret (yes I am being anal because people are always anal to my shit), looks like you got some stretching going on there. Maybe you should fix that area of the UVmap. For all the time it looks like you spent on the top, looks as if you didnt spend more than 3 minutes on the bottom.

Ah, I could be anal some more, but I dont wish to.

I like all but the bottom section.
