AircraftkillerHere, the dirt and assorted crap caked on it are now more visible. The only other thing I'll probably end up doing is making the paint chip off slightly.

MUCH better. i really like this now. I doubt the dark smooch thing will make any sort of impact in-game, so i would leave this like it is now. Great work!

majikentHonestly, how closely do you plan on concentrating on this structure in game? I'd personally be too busy actually playing the game to be so anal about such things that you wouldn't even notice if it wasn't pictured by itself... Seriously.

Did you not read my post? I said the original turret only looked *[i]good[/i]* if you took a close look.
