Subject: New Forum design...
Posted by Crimson on Fri, 22 Oct 2004 20:28:48 GMT

It's not the theme that's the problem. The problem is that the forum software is very much out of date and I'd like to use the latest version, but all my custom modifications and design took about two full days of effort to complete by hand, and I don't see how I can make that kind of time comittment.
