snipesimoVerry difficult to do, I have no intent of doing it that way. If the demand is there for it to be re-done, I will, if not, the ones who don't like it can deal with it. If you are taking about my idea it actualy not that hard to do. Took me 15 mins to take out all the load screen text. And I would of been done sooner but I messed up in 4 places and it took like 5 mins to find where I put an extra spaces.

PS were can i get the BETA CORE PATCH 1 loadscreen's background image?
