oblivion165 Learn to take a joke. The pot-hole was an extreme eggageration, they dont make vehicle like that for a reason.

The fact is this vehicle would not get stuck in a ditch much differently than any other vehicle.

Of course vehicles like this aren't manufactured. Do you know why? It's because of the ludacris looking design. It's too thin for much armor , The rockets would cause extreame heat in the cockpit and we don't have anything in this world that can make it turn completely invisible.
