First thanks for the tips, i've not formatted yet so i'm still around for now. I'll certainly make good use of the information here and if only I knew about it before the second one shattered, I don't think we can use the same disk online at the same time, let me know if i'm wrong.

As for us taking care of cd's, when the first one shattered and found out how obsolete Renegade was getting I've handled the discs with kid gloves. So its definaltey nothing to do with the owners of the discs its obvious its the quality, maybe the us versions are better.

Oblivion - you are just right not to divulge anything to anyone unknown, my personal history is as follows,

Only got into Renegade a little before xmas last year, really enjoyed it as a "Noob" but since then shit happens, my partners father died and i had a stressful summer, online gaming fell to the wayside and in terms of hours played i'm probably still classed a "noob" but I don't care, i love the game, I can kick ass when i want to. I'm maybe a crap shot but then again i'm 38 and a mother of 2 studying for a university degree so i'm usually v knackered and have turned to renegade for some lite relief.

So when someone calls me a noob and then my rating at the end of the game is far higher than theirs is, why should I care? I don't, i'm there to enjoy playing away and i don't take it so personal as some of the youngsters out there do.

That said, Iso's are something my fella knows that much more about and because of the problems with downloadable games with multiplayer passwords we don't really bother, we pay's the money and enjoy the game.

Doesn't stop him trialing a game though
