```

With this simple script you'll be able to just type "/r " followed by your reply, rather than typing "!page PlayerName YourMessage". You'll soon realise that this is an effective way of replying. All the regular moderators that use mIRC should not miss out on this one, it'll make your moderating so much easier.

Just open mIRC and open the scripts panel by pressing alt+A, paste the following code blocks into the corresponding code category. To get the script working with your server you'll need to replace the following two values so they match the details of your IRC channel.

```
#brenbot    ->  Your mIRC Channel name.  
BRenBot    ->  The name of your mIRC game bot.
```

ALIASES (Alt+A) :

```
Quote:/r {  
  /msg #brenbot !page %PagerName $1-  
}
```

REMOTES (Alt+R):

```
Quote:on *:TEXT:*:#brenbot: {  
  if (BRenBot isincs $nick) && ([Page] isin $1) {  
    set %PagerName $remove($strip($2),  
  }  
}
```

VARIABLES:

```
Quote:%PagerName NoPlayerGiven
```

Hope you guys find this useful.
