Maybe a forum called Downloads?

People share what downloads are available from the net (legal), whether its from C&C to Virus Removal Tools.

Don't get me wrong, I like the idea of a forum that shares personal thoughts & issues, but would that last? might it be a forum like Win32 FDS which is hardly used?

Its unpredictable at this stage, but if it was, you'd be kicking yourself

Give the Forum a 2 month trial, and if all isn't as what you thought it would be, scrap the idea Just Brainstorming.

C Ya

Andy
