Xtrm2MattLet's take this moment to compare Half-Life 2 / Half-Life 2: Death Match / Counter-Strike: Source to Renegade.

Okay, there is no comparrrison what-so-ever. The graphics in Renegade sucks. The gameplay now sucks. It sucks.

On the other hand. Half-Life 2 was awsome. "Best graphics ever" (it has this award). Half-Life 2: Death Match, very fun, great addon. Counter-Strike: Source, not only is Counter-Strike the most played Multiplayer game ever, it now has the best graphics I've possibly ever seen (with everything on full, of course).

I'm sorry to say, but I think Renegade has come to it's final weeks/months. Next summer, I predict no-one will be playing Renegade.

Hmmm maybe crimson can write an email to EA convincing them to release renegade as a free donwloadable game for christmas. I would do it but my word in this community means very little compared to Crimson.

That would indeed brings tons more players (The ones that have never bothered to buy it would surley see it on fileplanet) and we might get a larger community. All in all it would give the game more time and it would promote people to play the mods going to half life 2.
