Hi all,

I am constantly scrolling page after page of topics to find my own listings but to no avail.

Would it not be more prudent to devise an Alphabetical Indexing Device? ( ha! ha! AID) get it.

Also, can someone in the interim period, please inform me how to search and find the answers to my questions? Some of us Noobs are doing all this on limited PC skills. Its embarrassing to ask the kids to show me as they then take over, whereby i go back to square one.

How do you access pages 4-20 without clicking on each and every single page? Can i pick ie. page 10 and get instant access?

Cheers all,

keep up the excellent work

Ian (splash1st)
