To be honest, Im not impressed with it. It keeps people from cheating sure, but when some n00b forced me to use rg, I had to stop using all of my custom skins and hud textures, which pissed me off.

I was also banned from the rg network for doing something that I didnt do in the first place, so I actually had to edit my registry to get rengaurd to work.

Im dissapointed with it, hopefully 1.04 is better.
