Umbral\_DelaFlarel see a problem with the model.

Notice the rear half of the engine in the second screenshot, and attempt to align it with the front half of the engine. You can clearly see that they are off a bit.

Other than that, it's a good model and texture.

Since you mention it, the second segment of the engine is not meant to have the same alignment as the first half.

Renardin6OMGZ!!!LOOKS LIKE PL4STIC!!!

Personally, based on your texture work, I have no reason to believe that you can distinguish between plastic, metal, and cement. If you could, your textures of the three would be probably be different.
