---

i just want a site for when ppl wanna see what i can do with video and or ppl i know do music so i can host their music ..

probably not a lot of traffic.. maybe a few hits a day.. biggest video i have is 22 mb.. i don't host the professional style video just because it's too big a period..

if it's like that i'll send a DVD with it on it u know.. then it's money

100\$ a year for 1.5 gb day / 3.0 gb month.. any good or should i go elsewhere?

i'm not a site builder and i'm just looking through sites that do all the BS for u and show the video when u click the link
