Panther, I don't even see why you visit these forums. It seems like to me you just come here, and regardless of the quality of the work, you grumble about how sad it is. You wanna know what's sad? You visiting these forums not to learn about modding or read the latest news in Renegade modding, but to express the same ignorant and meaningless opinion every time you open your goddamn mouth. I can't remember the last time you posted anything even remotely worth reading.
