For renegade server you could run a server with 60 people,(or two 30 person) full 24/7 and still use under 1000gb/month. Renegade uses about 60 kilobits/sec/player. (so says westwood in the fds)

Everything is rounded for the sake of not using a calculator.

$60k * 60 \text{ players} = 3.6\text{MB per second}$

$3.6\text{MB} * 60\text{sec} = 216\text{MB per minute}$

$216\text{MB} * 60\text{min} = 1.3\text{GB per hour}$

$1.3\text{GB} * 24 \text{ hours} = 31.2\text{GB per day}$

$31.2\text{GB} * 30 \text{ days} = 936\text{GB per month}$
