Hmm, i am closing this account, and i will travel your forums under a different name... ill see if u notice who i am. if u do then everything above, i will accept as true... if u do not realise, then i hope this post will be dissbanded, and u will forget.

We shall see who is sad and has no life.

Look, all i want is renegade to go back to how it was origionally. Rengaurd will not stand tall forever. Its day will come. We spy onto you as you spy onto us. We know what packets rengay sends out and recives, we can easily emulate them. Not hard, i bet everyone in this forum could do it.

You will not delete this if it is a stupid glitch, which is really pathetic. Cos if is pathetic then what harm can it do.

**\*\*OPEN SOURCE\*\***

Start Renegade

Click "Lan Games"

Type in the name of your choice

Click "Host Game"

Click "Start Game"

When the game has loaded, pres "Esc" & "Quit Game"

Go back to the Main Menu

Hover your mouse over "Lan Games"

Very quickly press Enter, Up, Enter, which simulates clicking "Lan Games" and "Internet Games" at the same time.

Click "Advanced Game Options"

Select the game of your choice

Enter the game

You now have the persons name that you entered the first time you went into "Lan Games"

Very simple i know, but very effective. But also "pathetic".
