Now come one guys,

THATS funny!!!

Why go through all the hoops? you know there are far easier ways to do that right? I mean a guy as smart as you.....

So would someone be so kind as to post this clowns IP and/or cd key so that it can be properly banned on all servers?

sorry for continuing the sillyness, but here goes anyway...

what do you mean

"the way renegade use to be?"

Just say it, you want to cheat. "The way renegade used to be" was AWESOME! No cheaters, lots of fun. Then people (quickly) figured out how to cheat, they posted it to webs sites, punks like you emulated them by useing their knowledge. Now Renguard comes along and brings back

"Renegade the way it used to be"

as in, cheat free. Hey, if you want a cheaters server, why not just put up a server? why does it offend you so much that we dont like to cheat?
