Subject: Renegade Hacker
Posted by msgtpain on Thu, 20 Jan 2005 08:05:16 GMT

The person that has done it once in our server joined from an AOL IP, their name before they joined as a moderator was TgSAero, which also maps to trsagreen. Their serial hash is available in the server owners forum for anyone that would like to perm-ban them through the SSC, if they ever want to try and play legit with RG.

A word of advice to Mr 1337 haxxor.. if you're going to do it, you probably shouldn't join a server, !showmods, then leave and come back as one of them... it sort of gives you away, sorry.

Gamebot's been updated to kick the second person to join a server, when a player with that name already exists.. If you do it on The Pits, you'll have about 4 seconds of enjoyment...   sorry.
