lol i'm so sry for doing this so many times, but i'm getting SO pissed off.

i've hooked it up to gsa apparently by just changing the server.ini to gsa and not wol. I start it up,
everything looks fine. I CANT see this shit on gsa!! i even tryed doing
ccrenegade://ipaddress:port/?type=game
GSA goes grey like its supposed to then!!..

nothing happened.

lol dont flame me cuz i use gsa, i know it sucks but i need it. heres a screenie of the master server
starting up and stuff

Any ideas? I'm begging you guys! OH and my firewall is OFF!
