XeonTeam what do u expect a white hat hacker to do... no i am not a cheater... i am a creator...

First, you aren't a creator. I'm not, nor is anyone else here. Only Yahweh can create.

You are not a white hat hacker (I prefer using the term cracker). Are you decrypting security barriers allowing second and third world countries from using certain software? No. Are you involved in CSS decryption, which allows GNU/Linux users play encrypted DVDs? No. Are you testing servers for security holes? No. Are you finding lawful ways around cumbersome software patents? No. Are you working on OpenBSD, a very secure OS? No.

You're do nothing to enhance or help anything. You're not even destroying very well. Why don't you apply your skills to something useful?
