This is what ive gotten from it: cassie is actually like a 30 yr old man who lied about his age and lied to the UN clan after the UN clan helped him set up IRC, his servers and all other whatnot. Then thats when he talked in TS and using a voicechanger to sound like a girl. Then they later heard his real voice and banned him from basically life on the UN servers/Forums/TS and whatnot. Then cassie threatened to hack PaulC's computer (PaulC is a member of UN clan).

This person seems to just be bluffing. I doubt that heshe has the ability to hack a computer when heshe cant even decide what gender heshe is
