cowmisfitSuperFlyingEngi Subjective reality should not be portrayed as an absolute truth.

And by the way, in case my point went right over your head, I was referring to your excessively crude choice of language and name-calling.

Oh, and you obviously highly misinterpreted what I said. Read you first sentence. No, read it 15 times. Then read what I said. Repeat until you can contrast the obvious errors.

awww is the baby offended by my naughty words?? I think it helps to get my point accross. If i say "Liberal Tool you are such a silly guy" it wouldn't give it the same effect as if i said "Liberal Tool your a worthless excuse for a American you dumb fucker"

Ya see my point?? Didn't think so.

Read my first sentence?? I already did , whats wrong with it? Can't face truth? Ah, I don't expect much from you so im not all that disappointed.

The "baby" is sick and tired of your idiocy. Why don't you just try to calm down your stupidity to the 4th grader level so we can start having constructive arguments here?
