Kitty Taco 00A) Renguard is adware, it took about 13 seconds for me to delete it... A new record for Renegade mods! :twisted:

B) Renguard does NOT allow you to run skins or drop mods, and it permanently deletes the file... I LOST MY BEST DROP MOD THAT WAY!

C) I did a survey, 6/10 people have had a worse C&C Renegade experience since they downloaded Renguard.

and...

D) If you have cheats why would you run Renguard in the first place?

Counter that... Each bullet is 100% true.

lol that is super funny,

A. Plz explane who renguard is adware. but I think the second part is true, 13 secs to delete it.

B. I have 7 skins, and all renguard does to them in NOTHING it does say you will not be allowed to join a pure server are there even any pure server out there? maybe 1 or 2 if that (i just cheaked there is one 7 player server Test [RG] that is runnign in pure mode and that's it). I have 6 drop mods sitting in my data forler and to tell you the truth renguard doesn't give a crap about any of them, i also have custum sounds and again renguard doesn't care that i have them.

C. Your survey was where? on a cheating site? I know renguard did create a worse C&C Renegade experience for all the CHEATERS out there.

D. And you woud run renguard to prove that you are not using any cheats at this time and some servers will only let you join if you have it running and some others if you get a few lucky kills will also force you to run it.

Counter that you cheter.

PS. <-Troy->White-Power you are somehow starting up 2 renegades or not using the renguard button to start renegade. IF you are using WOL then start renguard, click in the Renegade button on the bottom left if renguard and use it like normal, If you are on GSA then go to gamespy make sure that gamespy thinks that renegade is game.exe and then just click on the server you want, renguard will start up and then you click the renegade button on the bottom left of renguard and it will work. there are also compleate instruction on this in the renguard Biginers guide on the left side of renguard or just click here [http://www.renguard.com/\\_client\\_html/guide.php?language=en](http://www.renguard.com/_client_html/guide.php?language=en)
