I have a problem with renegade and it might have to do with the files. I don't know if some files are missing or not supposed to be there so if I list them can somebody tell me what happened?

Okay, I go to My computer then to my C drive, into my westwood folder, and into my renegade folder here are the files in there: Data, HTML, Patches, \_~DOWN\_L~D, 00000409.016, 00000409.256, 54251\_\_\_, ARI\_\_\_, BandTest.dll, Binkw32, drvmtg.dll, Game, Luncher, Mp3dec.asi, Mss32.dll, Mssa3d.m3d, Mssds3dh.m3d, Msseax2.m3d, Msseax.m3d, Mssfast.m3d, Notes, Patchget, PATCHW32.DLL, Readme, Readme, Register, renegade, Rengade.lcf, Scripts.dll, secdrv, Uninst, Uninst.loc, Uninst.wsu, Uninstll, Woldata.key, WWConfig

In my Data folder: XXXFC.tmp, awalys, awalys.dbs, C&C Canyon, C&C City, C&C Complex, C&C Field, C&C Hourglass, C&C Islands, C&C Mesa, C&C Under, C&C Volcano, C&C Walls, M00\_Tutorial, M01-M13, Skrimish00, Stylemgr, WVAudio

In Patches: No files

In HTML folder: Assets folder, Frame, NavBar, BadPage, Loading

In Assets folder: Bkgd\_Loading, Bkgrnd, Bkgrnd\_Navbar, Bounding\_outline, btn\_ok0, btn\_ok1, connection\_error\_title, loading, navback0, navback1, navcancel0, navcancel1, navrefresh0, navrefresh1

In that's it. I have tried reinstalling Renegade 3 times, When I put the disk in it goes to setup menu, like Play Game, explore CD, etc. I click it and nothing happens it just stays on my desktop. SO if anyone could help me it would be extremely helpful I really want to play Renegade again!
