Okay, do things in this order:

- 1)Install Ren
- 2)Patch Ren
- 3)apply no-cd patch
- 4)restart the computer
- 5)install RenGuard
- 6)download the Stand Alone version of CP1(no offense to the team but I prefer to get my patches separate from everything else, tis one of the reasons I hate Steam)
- 7)restart the computer
- 8)install any maps or character/vehicle/weapon skins you might like or need(I have smiley faced c4 and smiley faced bullet holes for instance)

If all this goes according to spec you should have a fully customized install of ren ready to go.
