Nightma12ACK, we will spell it however the fuck we want to as long as people understand it  
:rolleyes:

Spelling it wrong doesn't really show any real semblance of intellect. Or rather the apparent lack of attempting to spell it correctly shows that. Sure, not everyone knows how to spell every word correctly, and there are keyboarding errors. But stuff such as "u", "r", "wut", "NVM" offer neither as a possible defence.

So, if you WANT to come accross as being someone with a low intellect, then by all means, continue.
