I left renegade almost a year ago thanks to the cheaters, but decided to give it another try yesterday. I can run renegade perfectly with NO lag, but when i add renguard, my pings go off the chart and i lose connection and can't stay in a game. Uninstall renguard, and presto, renegade works. I have uninstalled and reinstalled everything many times. It cant be my server or a virus or spyware, because it works fine otherwise. Any ideas? I'm XP, ram 512, intel pentium 4, dsl connection nortons internet security

Thanks!
