Hello All,

I would like to make a text based game with admin and everything. But I have a problem. I have the PHP skills to create the game but not the graphical skills. Would someone build me two templates, one based on the team GDI, the other on Nod (NOD), which ever you want to say,

I don't have any money to offer you so I will give you complete administration over the game with me. You will have Root access to the admin system and can't be modified, only be your account or by the database.

Please reply,

Dead6re

PS: Thanks to anyone that offers.
