LOL These pathetic kids sound just like the old WSE guys did. Acting like its some kind of war between "them" and "us". Get real it's just a game. We like playing it and will continue to do so, and will continue to make sure its a fair game and nobody is cheating. It's really quite amusing how you act like its your right to cheat and that we are the ones in the wrong just for wanting to be left alone and have fun playing our game.

Doesn't matter since you cannot hack RenGuard (and I know how hard dorks like Cyberpunk are trying), and the best of us only play on RG servers. You can still get your jollies by cheating on n00b servers, if you like shooting fish in a barrel. I guess that is huge entertainment for small brains. I really doubt there is more of "you" than there are dedicated players, and like I said RG owns you so doesn't really matter.

Keep on calling yourselves "hackers" and whatnot....LOL. You guys load up leveledit, change some presets and call yourselves hackers...lol the stuff you are doing is no more difficult or complex than the things people do while playing an RPG game. No skill at all. Just like the people who spraypaint their name on the wall of a building and think they are cool, when really people are just laughing at how pathetic you are.

Ah well...keep up the good work, the rest of us will need you in a few years when you grow up and are pumping gas for us

Good riddance :twisted:
