Remember that small mod I put together a while back? Well, there's a lot more in this pkg than just one level. Lol.

I was going to use the map from the last version, but the presets got all screwed up and would be a waste of time to try to get it working again. But I have a total of 4 levels now with some with unique game types.

C&C_DM_Carnage

C&C_AwpMap

C&C_DSR_F5

C&C_CTF_FireIce

Everything you truly need to know is in the link above. The link goes to the webpage that will answer all of your questions about the mod (even a screenshot for each level).

If you have any issues getting it to run, post them and hopefully we can get it to work.

If you have any issues from missing textures to something crashing the game, please post that too. I need to know all the stuff out of the ordinary.

Thanks,
