---

I was playing with Renguard since it came out.

Installed an older Grahpics card driver yesterday, because I thought it would work better with my old card (Leadtek 4600Ti, 43.45))

You are right, RG didn't give me any welcome, but it installed cp1 via RG again(online).

cp1.

I can play on all (at least all they get me a chance to see) USA Servers, but I think RG servers are allready filtered out, in my case.

Server is sayin, "blala is not using RG, he might cheat "

I think it must be a thing , of instal...

Everything works(I play on All seeing eye servers normally).

I just cannot understand, why I lock in with RG into the Game and then somebody tells me: You are not usin RG!

I know, that RG makes an Game2.exe, but it does not work at all.
