Yes, it's exactly the same.

The only thing that would make this illegal is if he claimed it as his own, or used it for something else. And I can't see why he would even want to do either.

Just because I don't WANT Renardin to post here, doesn't make it illegal, this is a public forum.. Same for just because Renardin didn't want Aircraftkiller to find/download that work, still doesn't make it illegal, it was in a public folder.
