AircraftkillerSpoony Do you speak better Dutch than JPNOD speaks English? I'm curious to know.

I don't attempt to write or speak in languages that I don't have good enough knowledge of. Whether or not I speak well in other languages has no bearing on teaching him how to write in this language.

For real man....piss the fuck off. Unlike you the rest of us understand that he may not use proper English. Also, unlike you, the rest of us have the ability to use context clues.

For the cock-knocker that you are...

Definition: a method by which the meanings of unknown words may be obtained by examining the parts of a sentence surrounding the word for definition/explanation clues, restatement/synonym clues, contrast/antonym clues, and inference/general context clues
