Day by day more and more people are abandoning IE6 and moving to either Opera or Firefox

Exactly after 99 days of Firefox's release there were 25 million downloads.
Currently up to date there is nearly 27 Million.

But, I can tell you that Microsoft are currently developing IE7 which might be released before Windows Longhorn (2006). So Microsoft may once again dominate the market and steal other developers idea's...

But before releasing a website for the public you must have it tested on other browsers and fix all bugs as it will just deter vistors away.

Andy.
