icedog90It's those stuck up admins in those worthless servers... Try joining popular servers like n00bstories instead of PistolServ.

N00bstories had very bad moderators when it was hosting servers for renalert. I don't know how that's going now though.

But it wen't like... Kill them and get (q)kicked a second after it for "cheating". So i have seen enough n00bstories for one life time...
