OK this is how you play. I will type a name and then with the last letter of the name I type you will have to think of a name started with that letter. Then when you think of a name you type it in the forum and then the next person will have to think of a name started with the last letter of that name... and then it goes on and on... OK?

Heres an example; I type Brandon lets say someone comes and types nina, then another guy comes and types Angela.

do you get it?

Ok here's the starting name;

GERARD
