I have been learning HTML for the past month. Go to [www.20fr.com](http://www.20fr.com) they have all the stuuf you need. Host with them they kick butt. They have tutorials on makingorder forms, visitor trackers, all that. They even have a web design program. I did my website all by myself though not with any help from 20.fr except with the forms...

Check out my site. You will get the idea.
