The part for Jonwill: Contact him (just an idea )

The version mismatch is caused by the cameras.ini, because Ren recognices a different versions of the ini's on your PC and think you have diferent version (that is to prefent ini cheating, because how powerfull a wepon is is also defined in an ini-file)

I dunno if it works if both have the same ini-file but I don't hink so (its the same on a Win DS)
