DJMGetting another CD key is simple, go into C: Drive and press ctrl + a, then backspace then enter.

This is a folder created by westwood to stop gamers using false serials, delete all the folders on the C: Drive and any serial (even 0000-00000000-000000) you enter in the installation will work.

windows wont let you delete itself....just everything else Just go into the registry and change it there, thats where most games store serial keys....

besides, not everyone has their stuff on one drive...i got games on C:\, Music on D:\, Videos on E:\ and Windows on F:\, Websites on I:\ and backups on Z:\
