You missed 1 (or 3) quotation marks. Your retarded self forgot to add a quotation mark around the 50%, and it'd probably be best if you had quotations around the 60%, but not needed.

As for the position absolute: duh it's going to move per resolution. The absolute position means that it will be at the same point whether or not the resolution changes.

Example:

A point at (2, 2) on a 4 x 4 grid

```
....  
....  
....  
....
```

Now the same point (2, 2) on a 8 x 8 grid.

```
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....
```

See, instead of the point staying near the middle as in the first example, it ended up being towards the top left hand corner on the second example.
