however if they really are a problem you can look in the server2.ini for now and change all the values to 0 apart from say refill crate, and set that to 100, this way the only crate people can get is the refill crate (or if you wish make money 50 and refill 50, this is the closest to the original as you are gonna get really, well using the server2.ini anyway...) this is only sympton treating, but it will disable all the rest of the crates...
