More options for server owners to customise there own server in my opinion is good. I dont agree with the dependancy of the refinery, i feel the donate cmd shoul be allowed always. With zunnies idea i can choose, if you like it on your server set it up like that, if you don't, configure it another way...

Great idea, i would like to be able to set a maximum donate amount, but i also would like to be able to set the map specific too...
