SuperFlyingEngi- You don't know what a cerebral cortex is, do you?

- Fake emotions for two years straight, providing an incredible amount of care for Terri? And it's not like he just stopped one day, either. There'd better be a damn good reason to disprove that.
 - Only in your eyes, not the eyes of something important that matters, such as the law.
 - Am I a biology major? No. Stop trying to make yourself seem smarter because I don't give two shits about the anatomy of a human being. I know the basics, and that's all I need to know in order to get through life. If I want to pursue science as a major, it'll be Chemistry anyways.
 - It's not that hard to fake emotions. So he cared for her for years on end. Who knows he could have had some incentives to do it. There was probably something else from him to gain from it. I don't know what, I really don't care to know what.
 - So not having the proper documentating showing that Terri would have wanted this is legal?
-
