I redone the UberMapPack, this is 100% the final version lol.

This is perfect for anyone with "moderately slow" internet, just download this one package and your 246 maps richer and just back it up on a CDR or something

I dont think i missed a map but could be wrong, if so: sorry

you'll have to download it outside the package somewhere then, no way in hell and back i gonna repack it all again just to add one more map LOL
