Nightma12WNxCABALun-compressed, what is the total size all the maps take?

Edit: 387 File(s) 2,556,726,303 bytes

my ren data dir is now 4.40GB, rofl

That sounds about right. I had over 5 gigs when I was at the point of wanting every single map that was made available. Then I cleaned out my data folder.
