I'm not, and never said I was. I was talking about other authors. Do you even read what people write before you respond?

Dan... Please for your own sake just shut up. You have no idea why he wrote that post, I do, so I replied. He was talking to me before, otherwise I wouldn't have responded at all. :rolleyes: This is why I said the Renegade forums are a horrible place to get intellectual criticism of any work.

I mean, look at Iron Fart over there. Genius can't even read before he responds. Then you have the people like Dan that come out of nowhere and pretend they're smart by responding in a topic only to find out that their attempt at being witty was an act of complete retardation.
