Oh but you're wrong, I never whined once. I stated my case clearly and gave him the reasons why others would be concerned about what he was doing, because in the years I've been in C&C I've seen this happen before. Someone comes along and throws hundreds of levels into a "map pack" without permission and loads of people get pissed off.

Try talking to Cannis about this and see what he thinks. <http://www.cannis.net>

Tell him I sent you.
