genetixAircraftkillerWow, Reborn sucks wow

When the hell are you gonna shut the fuck up about reborn? We have heard it enough already. Your not gonna get any farther.

Your mod aint the best either. You promised a lot of stuff which you never did finish/make public.

I never promised anything. Lying isn't good, try researching what you're talking about.

Quote:Renalert sucks even more anyways.

We never made anything called "renalert", but a particular TV network might have made a game called Ren & Stimpy Alert...

And yes I know Eglin AFB sucked. It wasn't because of what it was based on, it was because I didn't have the schematics to remake the base properly. If I had access to satellite photography of the area I could have done it better.
