well dumbass Captkurt01 has successfully shown how to be a true n00b...

#1, your AI sucks

#2, you ripped off the map, or are as clever at positioning the c-130 as ack (i mean exactly the same place)

#3, you retextured it massively shitty

#4, basically... it sucks

#5, from what i see, you didn't have any higher FPS than ack's version (although you claimed it would skyrocket higher)

#6, you put snow... where it wouldn't go

#7, how is snow falling from cement cielings with no trace of snow ? see #6

#8, the big WHITE ASS snow drifts... come on, unless you live in a place like south dakota, they don't get that big without a snow shovel.

basically, "go away, or i shall taunt you a second time..."
