Allright, for those of you who get an error when launching Renegade (Error: Loader couldn't initialize service!) and have a problem with Antivir detecting SVKP.sys as a trojan, here's something I did to make it work:

Note that this could be risky, and some systems might react differently. Proceed at your own risk.

Go to Registry Editor (Start > Run > Regedit)

Search for "SVKP" and delete every match where SVKP is an individual word. (NOT aödfhlfhdlsfhsvkpdfhsldflkj)

Reboot. When Windows next loads, it should run a System File Checker and ask for Windows Pro CD (Even if you use Home ) Just press X. RG should now work.

Antivirus still moans about the file being infected with a trojan, just add the file to exclusions to keep it quiet.
